

*Moment for
Decision
&
Decision for
Safety*

The SRI Group presents a dual approach
to improving Hazard Recognition Skills.

Moment of Decision

Module 1

- The effects of hazards and errors
- Why hazards aren't recognized
- When to spot hazards
- Classes and types of hazards
- Recognize access and control

Module 2

- The importance of standards
- Review of various applicable standards
- Skills drill - participants review various videos and scenarios to improve hazard recognition

Module 3

- Review of various activities used to recognize hazards
- Training in SRI's Accident Prevention Techniques
- Training in safety coaching techniques to raise awareness and improve hazard recognition

Moment for Decision is SRI's basic hazard recognition module. This training is used to improve hazard recognition capabilities and to ensure proper corrective action is taken.

The difference between an injury free work environment and a less than desirable injury rate often comes down to the ability of supervisors and employees to recognize hazardous conditions and situations and then take appropriate action.

Excellent hazard recognition skills are not innate. They must be developed in each and every employee. SRI's Moment of Decision seminar will provide your organization with the training, knowledge and skills necessary to ensure workplace hazards are effectively recognized, assessed and controlled.

Moment of Decision curriculum includes training in SRI's award winning Accident Projection Techniques™ (APT's). APT's is a hazard recognition tool which improves all employees ability to identify and address hazards.

Decision for Safety

Despite all of our experience, intelligence and data, organizations still make mistakes, sometimes with significant consequences. The cause of these mistakes is often not to be found in procedures and program, but rather in the thought patterns and approach used in day to day management.

Decision for Safety is a 4 hour seminar which provides participants key insights into the role their decisions have in making or breaking safety culture. Each participant will learn: how to reinforce your organization your organizations commitment, how to improve recognition and response to hazardous situations, and how to reduce their organization's risk profile.

Session 1: Why Things Go Wrong

- The anatomy of good and bad decisions
- The effects of bad decisions
- Process oriented decision making

Session 2: Effective Decision Making

- 5 keys to effective decisions
- Turning decisions into action
- EH&S in strategic planning
- EH&S in business decision

Session 3: Reducing Risk

- Fundamentals of risk management
- Systems & activities that eliminate risk
- reducing your organization's risk profile

Session 4: A Conscious and Deliberate Approach

- Developing hazard recognition skills
- Tools and techniques of hazard recognition
- Using hazard recognition tools to improve culture

OTHER MODULES

In addition to Moment for Decision, our Hazard Recognition Seminar for General Industry, SRI also has hazard recognition training programs specifically for the industries and work environments:

- Construction
- Office
- Retail
- Healthcare

ADDITIONAL SERVICES

The Structured Safety Process™ (SSP)

The Structured Safety Process™ is a comprehensive systems-based improvement initiative which has produced unrivaled results for more than 30 years.

Complete Behavioral Safety Process™ (CBSP)

The Complete Behavioral Safety Process is SRI's multifaceted approach to behavioral safety. CBSP addresses all of the factors which affect safe work performance.

Accident Projection Techniques™ (APTs)

APTs is an employee-based observation process which increases awareness, improves hazard recognition skills and enhances personal accountability.

TIPPS Software

TIPPS is a web-based observation and event-tracking software that provides the forum to maximize behavioral safety data and improve prevention planning.

SSP Digital Training Series

SRI's proven training seminars have been crafted into a unique interactive online training series. Check out the demo today!

Auditing and Assessments

With over 30 years experience, SRI's consultants can help your organization evaluate the current status of your safety effort and develop strategies for improvement.

VPP Assistance

29 of SRI's clients have achieved VPP Star Status. We can help you prepare to join the ranks of these top performers.
