About Our Assessments

The SRI Group's Safety Culture Audit provides a total review to evaluate the strengths and weaknesses of your Organization's existing Safety Culture. The assessment will also provide proven recommendations to address areas of need. The SRI Group has completed over 500 assessments, thus giving us the knowledge and experience to recognize strengths & weaknesses within your organization.

This audit compares your organization's current efforts against other high performers within the industry.

Assessments typically last 1-3 days, pending the size of your organization.

Familiarization

First; this assessment is used to familiarize SRI with your Organization and with the cultural parameters which could impact implementation of SRI's Structured Safety Process™.

Strengths & Weaknesses

The second purpose is to identify areas of strength and weakness when compared to success parameters identified by SRI. SRI's extensive history of over 500 assessments allows us to utilize best practices learned from previous clients, and compare them to your organization.

Assessment Mechanics

The Assessment Team uses four methods to evaluate the current safety effort.

1. Documentation Review

The documentation review consists of an overview of critical programs, procedures and data.

2. Facility Tour

The facility tour and work observations are used to familiarize SRI with the nature of work, the conditions of the work site, and general compliance orientation.

3. Personnel Interviews

Interviews are used to gauge the perceptions of a cross section of site personnel and to verify current beliefs and practices.

4. Specific Program Reviews

Program reviews are typically completed by subject matter experts and are used to give SRI specific details with regard to critical HSE and other programs.

Elements of the Assessment

SRI evaluates 10 elements necessary for safety excellence, compared to your organizations current effort.

- ✓ Management Leadership
- ✓ Responsibility, Ownership & Accountability
- ✓ Process Organization & Communication
- ✓ Safe Work Environment
- ✓ Safe Work Performance
- ✓ Incident Reporting & Investigation
- ✓ Management of Critical Systems
- ✓ Contractor, Visitors & Vendor Safety
- ✓ Process Evaluation & Improvement
- ✓ Historical Factors / Systems

The Personnel Interviews

1. Interviews are typically completed on a one-to-one basis; however, when appropriate, group interviews are conducted.
2. SRI will provide a requested interview list. Requested interviewees will come from all levels of the organization, each Department and each shift
3. Each interview last approximately forty-five minutes.
4. Interviewees are apprised of the interview's purpose and provided a verbal overview of the Safety Culture Assessment and their vital role within it.
5. All interviews are anonymous.

Review of Preliminary Findings

At SRI, we believe in transparent communication and collaboration. As part of our commitment to excellence, we conduct a comprehensive review of our preliminary findings with key representatives of your Organization's Leadership Team. This session is not just a presentation but an interactive dialogue, ensuring clarity and alignment.

Typically, the Report of Preliminary Findings session spans between 1 ½ to 2 hours, allowing ample time for in-depth discussion and addressing any queries you might have.

The Safety Culture Assessment Report

1

The Assessment Team will evaluate the assessment findings and generate a comprehensive summary report.

2

Within two to three weeks after completion of the assessment, The SRI Group will supply the report to the Manager or designee.

3

This report will detail assessment finding and include recommendations designed to achieve safety performance excellence.

4

It is recommended that the Safety Culture Assessment Report be treated as a control document and all recommendations generate a response.

What Makes SRI's Assessments Successful

Success Roadmap

What separates us from our competitors is that SRI will not only identify what is right and wrong, but will give you detailed, cost-effective, and comprehensive solutions that meet your areas of need. SRI will provide your company with a roadmap to improvement.

Risk Reduction

SRI's Audits identify potential hazards and risks in the workplace. By addressing these risks, organizations can reduce the likelihood of accidents, injuries, or environmental harm.

Stakeholder Assurance

Stakeholders, can be assured of the organization's commitment to health, safety, and environmental stewardship, potentially leading to increased investment and support.
